

You can now enjoy true high fidelity sound without impacting on your living environment.

The CS230HQ ceiling mounted speakers are the ideal solution for those people who require a non intrusive solution to high quality sound reproduction.

CS230HQ

CEILING SPEAKER

The CS230HQ ceiling speakers do not encroach on living space, and they are virtually invisible. They do not clash with your decor in the way that big black cabinet speakers can, and for those of you with young families, they are out

of reach of the inquisitive hands of small children. Such qualities, make the CS230HQ ceiling speakers particularly suitable for "round the house " music systems.

At the heart of the CS230HQ is a hi-tech co-axial full range speaker system, featuring a polypropylene cone with an inverted roll rubber surround and a Polyester diaphragm dome tweeter. An **easydrive™** 8 Ohm impedance, ensures ready compatibility with any split zone applications.

SPECIFICATIONS

- **BASS/MID DRIVER:** 1 x 165mm (6½ in) Polypropylene
- **TWEETER DRIVER:** 1 x 25mm (1 in) Polyester diaphragm
- **FREQUENCY RESPONSE:** 60Hz- 20kHz ± 3dB on axis
