KMS - Source Selection & Volume

KMS - Source Control Options

INSTALLED?	Source	Control	<	>	□	🌀
<input checked="" type="checkbox"/>	TUNER		Pre-set down	Pre-set up	Pre-set 1	
<input type="checkbox"/>	CD		Track up	Track down	Stop	Disc up
<input type="checkbox"/>	MD		Track up	Track down	Stop	
<input type="checkbox"/>	TAPE		Back wind	Forward wind	Stop	
<input type="checkbox"/>	SATELLITE		Channel up	Channel down		
<input type="checkbox"/>	VCR		Back wind	Forward wind	Stop	Pause
<input type="checkbox"/>	DVD		Track up	Track down	Stop	
<input type="checkbox"/>	TUNER2		Pre-set down	Pre-set up	Pre-set 1	
<input type="checkbox"/>	CD2		Track up	Track down	Stop	Disc up

DMS

INSTALLED?		NORMAL	ENGAGED*
<input checked="" type="checkbox"/>	SOURCE 1	Tunr	tunr
<input checked="" type="checkbox"/>	SOURCE 2	Cd	cd
<input type="checkbox"/>	SOURCE 3	Tape	tape
<input type="checkbox"/>	or	Sat	sat
<input type="checkbox"/>	SOURCE 4	Dvd	dvd
<input type="checkbox"/>	or	Tun2	tun2
<input type="checkbox"/>	or	Vcr	vcr
<input type="checkbox"/>	or	Co2	cd2

*ENGAGED display is a courtesy notice to indicate that the source chosen is being played in another zone already. It is still possible to change the source but it may effect the listening pleasure of another zone.

Volume is displayed from 0-63 (0=OFF). ie **Vo1 34**

Time is displayed whilst system is in Stand-by. ie **13:21**

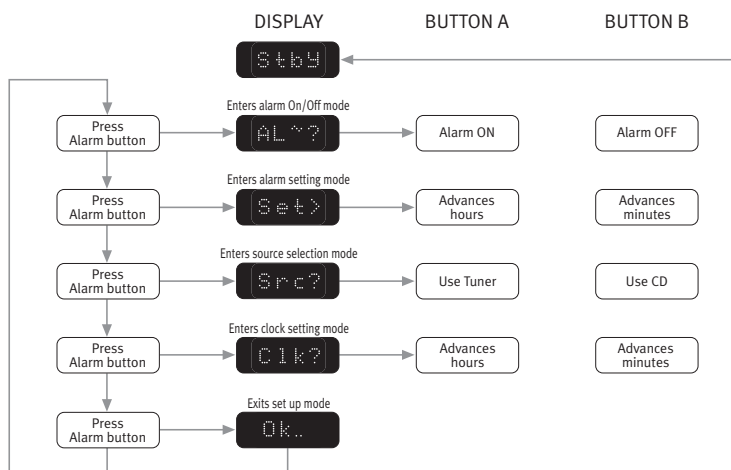

(()) indicates that the paging has been activated

Mute indicates volume at zero (zone is still ON)

Stby indicates Stand-by mode (zone is OFF), this display is then followed by the time display. ie **13:21**

To program alarm or change time* (assuming DMS is in Stand-by mode)

*CLOCKS ON DMS DISPLAYS WILL SYNCHRONISE WITH THE CLOCK ON ZONE A DMS AT 12:00

If a zone splitter is installed within a zone to allow you to switch between a 2nd set of speakers in a different room there will be an illuminated LED below the one or both of the two buttons marked "A" and "B".

The illuminated LED indicates that the speakers are active. It is possible to have pair "A" active or pair "B" active or both. Note it is not possible to turn both pairs OFF so if you wish to switch from pair "A" to pair "B" you must first activate pair "B" before being able to deactivate pair "A".

SYSTEM OVERVIEW

Your Systemline installation will include some, if not all, of the following items:

Keypad Module (KMS)
Used to select source and issue commands to that source.

Display Module (DMS)
Displays information about the status of Systemline and also receives commands from RHS

Remote Handset (RHS)
Issues commands to select and control sources from the comfort of your armchair.

Systemline Controller S4.3
Nerve centre of the system. The Controller should be left switched on permanently, and once set up by your installer it should need no further adjustment.
